

Performance Modification Agreement & Work Authorization

Torque Theory · Coupland, Texas

PLACEHOLDER DOCUMENT

This is not the real form. It exists so the download link on the website resolves, and so the real file can be dropped in without touching any code.

To publish the real one

Export the shop's Performance Modification Agreement as a PDF and save it over this file, keeping the same name:

`assets/docs/work-authorization.pdf`

Nothing else needs to change. The site links to this path from the vehicle inspection copy, the diagnostics page and the booking form.

Important

Publish a BLANK form. The copy currently held in the shop's Drive folder is a completed agreement carrying a customer's name, phone number, email address and the vehicle's VIN. That must not be uploaded to a public website.

What the real agreement covers

Work authorization, customer acknowledgement of vehicle condition, assumption of risk for performance modification, release and limitation of liability, the absence of any warranty on gains or dyno figures, emissions and off-road responsibility, storage and abandoned vehicles, photography and road/dyno testing consent, arbitration, and a vehicle inspection checklist.

The optional \$75 vehicle inspection is performed at the customer's own risk under this agreement, which is why the website links to it wherever the inspection is offered.
